RE: MM Docket No. 99-325

Dear Ms. Dortch:

The supplemental audio channel capacity is a "dream come true" for small market rural-based stations such as KXCV/KRNW. We are the primary sole signal in the vast area of Northwest Missouri and Southwest Iowa and are thrilled at the possibility of being able to offer two program services to our listeners. It is tremendously exciting to think of being able to have an all-news service in this land where news is at a premium along with quality music programming, also in a land where attending live concerts by professional musicians is a rare opportunity.

The supplemental audio channel will provide KXCV/KRNW with a very cost-effective means of expanding both the quality and quantity of local, diverse programming.

Sincerely,

Sharon Bonnett

General Manager, KXCV/KRNW
